

MONTHLY PROGRAM NARRATIVE—Suffolk County
Testing as Prevention (TAP Program)

Report Month/Year: June 2024 Date submitted: 07/08/2024

1. Please share one or two major accomplishments and/or challenges that the Testing as Prevention program experienced this month.

The Testing as Prevention program found a little difficult to reach people, as people are enjoying their summer, and there are less summer events than in spring.

2. Did the program reach its projected number of HIV tests this month? Yes No

Projected Number of HIV tests for the Month 20
Actual Number of HIV tests for the Month 12

If no, please outline the program's plan to increase HIV test numbers.

Have a better promotion of events with the contacts in the locations where events are scheduled.

3. Please describe the method(s) used this month to promote the program in the community (i.e. flyers included in mailings, email/internet promotions, conferences/health fairs, calls to organizations – etc.)

The scheduled events were aware of our testing program, and made their clients/patients aware.
